# HIGH SPEED, DEDICATED FIBRE ETHERNET CONNECTIVITY WITH GUARANTEED CONSISTENCY WITH SOCONNECT

Available across the UK, EoFTTC (Ethernet over Fibre to the Cabinet) is essentially a superfast fibre Ethernet connection over fibre broadband infrastructure. This means it offers all the benefits of a standard FTTC connection – such as high upload and download speeds – but with the added benefits of being an Ethernet service like EFM. This means contention is managed or non-existent and it comes with an 8hr fault fix time.

## ETHERNET OVER FIBRE TO THE CABINET IS IDEAL FOR

---

Delivered over our fully fibre optic network, Ethernet Over Fibre to the Cabinet has the reliable bandwidth for high-end business grade connectivity. It supports technologies like VoIP and cloud-based services so you can access high quality voice, data and video quickly.

- ✓ Medium - Large enterprises
- ✓ Businesses that need a faster installation time than other Ethernet services
- ✓ Need access high quality voice, data, video and cloud based services and applications
- ✓ Companies that need consistent, uninterrupted Internet access
- ✓ Businesses that need high-grade connectivity
- ✓ Bandwidth is reserved exclusively for your connection ensuring consistent symmetric speeds
- ✓ Business that want a fantastic low cost Ethernet option
- ✓ Businesses that have outgrown broadband but don't need full Ethernet
