HIGH SPEED, HIGH PERFORMANCE, LOW COST SUPERFAST FIBRE BROADBAND FOR BUSINESS WITH SOCONNECT

Superfast Broadband also known as FTTC (Fibre to the Cabinet) is the next generation broadband connection. Superfast Broadband uses fibre optic cables as part of your internet line connection to provide much higher upload and download speeds. The fibre optic cable is used between your nearest street cabinet and the exchange. The line from the street cabinet to your business location uses the existing copper network but as copper performs well over short distances the performance remains high.

FIBRE TO THE CABINET IS IDEAL FOR

Delivered over our fully fibre optic network, Fibre To The Cabinet delivers the very best performance possible over a broadband connection with speeds reaching up to 80MBS making it the ideal service for businesses looking to get the most out of their broadband data connection.

- ✓ Small - Medium enterprises
- ✓ Best value for money for a high speed connection.
- ✓ Businesses needing a faster and more reliable connection than standard ADSL.
- ✓ Businesses that require a solution to run cloud based collaboration services
- ✓ Better uploads speeds than standard ADSL to run Video, Voice and Data.
- ✓ Looking for a more consistent service that is not as susceptible to issues with contention
- ✓ Better communication with "remote" staff.
- ✓ A service which can easily scale with your business.
