HIGH SPEED SATELLITE BROADBAND TO ANYWHERE IN THE UK, WITHOUT THE NEED FOR A PHONE LINE WITH SOCONNECT

Satellite broadband is Internet connectivity provided by satellite, rather than a cable or phone line. Uploads and downloads are done via satellite and so connection speeds remain high and are comparable to other broadband technologies but with the added benefit of being available everywhere throughout the UK, even in the most remote areas. Not everyone can get high speed internet using other technologies so satellite provides a perfect solution for businesses in this situation.

SATELLITE BROADBAND IS IDEAL FOR

Unlike other broadband services, Satellite broadband is not reliant upon a line based network, instead the network uses satellites to transmit data traffic, meaning that it can be used in even the most rural areas making it the ideal service for businesses looking to improve their data connectivity in even the most remote locations.

- ✓ Small - Medium enterprises
- ✓ Perfect as a backup or disaster recovery service
- ✓ Flexible rates to suit your budget
- ✓ Businesses in remote locations that need a business level data connection
- ✓ Those needing a higher upload speed than other broadband services
- ✓ Perfect for rural businesses that have limited connectivity options
- ✓ Looking for a more consistent service than ADSL connections
- ✓ A service which can easily scale with your business.
