

Cyber Security: Microsoft 365 Secure

INTRODUCING MICROSOFT 365 SECURE
WITH ADVANCED SECURITY AND BACKUP.

Microsoft 365 Secure is an exclusive productivity solution protected by Vade, backed up by Acronis Cloud. Keeping your data safe and secure.

Developed specifically for small and medium businesses, Microsoft 365 Secure delivers extra value by combining productivity, security and backup solutions that work seamlessly together. It gives you all the benefits of the cloud – accessible anywhere, collaborative, flexible, scalable, secure and always up-to-date. Whether working remotely or on-site, safeguarding your data is paramount.

Phishing is the most commonly identified cyber attack. Among the 39% of UK businesses identifying any breaches or attacks, 83% had phishing attacks. Microsoft 365 Secure protects your business with intelligent security and provides backup with instant recovery. With Microsoft 365 Secure, you receive an advanced multi-layered approach to secure your data, giving you peace of mind.

If one of your employees clicked on a phishing email and your business data was held to ransom, what would be your solution? How long would it take you to restore data from backups? Vade and Acronis could be an easy solution.

**THE AVERAGE ANNUAL COST FOR
BUSINESSES THAT LOST DATA OR
ASSETS AFTER A CYBER SECURITY
BREACH IS**

£8,170

WHAT'S INCLUDED WITH MICROSOFT 365 SECURE?

MICROSOFT 365

All the productivity apps your users know and love such as Email, SharePoint, OneDrive for Business and Microsoft Teams.

VADE

Defends against advanced spearphishing, malware and ransomware attacks with global threat intelligence to predict zero-day threats. Bolts onto Exchange Online Protection.

ACRONIS

Unlimited backup storage with agentless, cloud-to-cloud daily backups. All data is fully encrypted in transit and at rest, with point-in-time restoration.

Productivity + Email Security + Backup

 Microsoft +  vade + Acronis

VADE ADVANCED EMAIL SECURITY FOR 365

The key to protecting your Microsoft 365 environment is to adopt a layered security approach. While Microsoft 365's native security features catch most mass spam waves and known threats, they don't provide sufficient protection against advanced phishing and spear phishing attacks, as well as unknown, polymorphic malware.

Vade's 360-degree analysis of the origin, content and context of emails/attachments means it examines more than 30 features of email content to block both known and unknown threats before, during and after attacks. So, should the worst happen, you can be at peace knowing threats can be easily identified and deleted to prevent further infection. Vade Secure also supplements its protection with traditional spam filters, blocking 99.9% of spam, an extensive blacklist and two complementary virus scanners.

Vade is the only native email security solution that sits within Microsoft 365, you won't even notice it's there. You and your team can work remotely or in the office, safe in the knowledge Vade is working hard in the background to protect your business.

ACRONIS 365 BACKUP

If the worst should happen, you could be spending hours retrieving data. With Microsoft 365 Secure, you can retrieve data in minutes with instant restore and quick email and backup search.

With Acronis Cyber Backup for M365, you don't have to face losing your valuable data. Stored safely and securely within a UK Acronis Tier-IV data centre, your data can be backed up 24 hours a day, seven days a week. It's the ultimate protection for your emails, OneDrive and SharePoint files.

With many businesses subject to an email retention period for regulatory compliance, email backup, and the ability to recover individual messages or entire folders from SharePoint or OneDrive, becomes mandatory.

Acronis provides customers with world-class backup protection every day. As an award-winning leader in data backup and file management, you know their solutions are trusted.

Cyber security checklist

Microsoft 365 Secure instantly elevates the level of protection against cyber threats. However, it is not your only concern when it comes to security.

Cyber Essentials Certification should be your next target.

Cyber Essentials is a simple but effective, Government backed scheme that will help you to protect your organisation, whatever its size, against a whole range of the most common cyber attacks. SoConnect can help you on your journey to this.

In the meantime, you can check how much progress you've already made by completing the handy checklist laid out below.

1. Use a firewall to secure your internet connection

- Understand what a firewall is
- Understand the difference between a personal and a boundary firewall
- Locate the firewall which comes with your operating system and turn it on
- Find out if your router has a boundary firewall function. Turn it on if it does.

2. Choose the most secure settings for your devices and software

- Know what 'configuration' means
- Find the Settings of your device and try to turn off a function that you don't need.
- Find the Settings of a piece of software you regularly use and try to turn off a function that you don't need
- Read the NCSC guidance on passwords
- Make sure you're still happy with your passwords
- Read up about second factor authentication

3. Control who has access to your data and services

- Read up on accounts and permissions
- Understand the concept of 'least privilege'
- Know who has administrative privileges on your machine
- Know what counts as an administrative task
- Set up a minimal user account on one of your devices

4. Protect yourself from viruses and other malware

- Know what malware is and how it can get onto your devices
- Identify three ways to protect against malware
- Read up about anti-virus applications
- Install an anti-virus application on one of your devices and test for viruses
- Research secure places to buy apps, such as Google Play and Apple App Store
- Understand what a 'sandbox' is

5. Keep your devices and software up to date

- Know what 'patching' is
- Try to set the operating system on one of your devices to 'Automatic update'
- Check the warranty dates on your hardware devices
- List all the software you have which is no longer supported

WHAT'S INCLUDED IN OUR CYBER SECURITY PACKAGES?

SoConnect provide a wide range of top of the line security products to ensure 100% compliance with Cyber Essentials.

GETTING YOU ON YOUR WAY TO CYBER ESSENTIALS CERTIFICATION.
